EDITORIAL NOTE

There is a problem in the original Whistling edition of 1843 (reprinted by Edition Peters in 1890), at measure 60. See the piano RH notes in the upper image, where the note values for beat 6 do not add up correctly.

Our solution for this transcription was to use 16th notes (semiquavers) for the final two notes of the piano RH. This allows these final notes to fall on beat 6 of the measure, which is presumably the intention of the composer.
